Delays caused by railroad maintenance. Besides the unexpected delays, passengers in August also experience delays caused by railroad construction and maintenance projects. Every effort is made to schedule this work during off-peak and weekends to keep the impact of delays to a minimum. We also post service bulletins in the stations and on our website in advance of anticipated delays.

Currently a joint construction project between NICTD and Metra is ongoing in an effort to make significant improvements to the service these agencies are able to provide in downtown Chicago. This construction will cause delays from time to time, but the two agencies are working closely together to minimize these delays as much as possible.
